

TIMESTONE

THE STONE OF TIME EVOLVES INTO CERAMIC.

Immersed in time, which flows over its porous surface, adding character to its appearance and chiselling its edges. Preserving its beauty against the effects of time, suspending the stone in space for all eternity. Strengthening it with crystallised instants in time featuring the intimacy of absolute light, enveloping and penetrating all the corners of every space, indoor and outdoor. Eternal, absolute beauty, for everyone, everywhere, forever.

Floor _ Timestone Beige

The modular format, also available boxed for a number of different compositions, further enhances the material's visual qualities and graphic variety in a balanced overall motion created by carefully dosed graduation of hues, so that random laying patterns and the resulting irregularity amplify all the product's naturalness, defining its creative value and the difficulty of its manufacture.

Floor Outdoor _ Timestone Beige

Edges artfully chiselled with apparent flaws, enhancing the classic contemporary style of a stone with a lived-in look, made even more realistic and precious by the hand of time.

TIMESTONE

TECHNOLOGY AND NATURE UNITED

A faithful, skilfully crafted reproduction in porcelain, perfectly replicating the beauty of the natural material inspiring it, thanks to the adoption of advanced ceramic technology combined with the utmost expression of technical expertise and good taste in making ceramics. The product of know-how, skill and years of experience.

The pits and other aesthetics features specifically associated with classic natural travertine are graphically reproduced in porcelain through new generation digital printing along with scrupulous attention to detail, creating a high level of aesthetic quality combined with great practicality, safety and ease of cleaning and maintenance for a material that will not be altered by the passage of time.
